PROFESSIONAL SUMMARY

Python backend developer with 3+ years of experience building and maintaining backend services, APIs, and data workflows. Worked on system integrations, data validation, and automation to improve reliability and reduce operational overhead. Based in Paris and available for full-time roles.

PROFESSIONAL EXPERIENCE

Software Developer

Nov 2023 – Apr 2026

Workabot.ai | Dubai, UAE – Remote

- Developed Python backend applications and Flask-based serverless services to support data integrations and automation workflows, improving system connectivity and reducing manual processing across business platforms.
- Developed SQL transformation and validation logic to clean and synchronize data across systems, improving data accuracy and reliability of backend workflows.
- Built AWS Lambda and n8n workflows to automate data synchronization and API processes, reducing manual intervention and improving reliability of system integrations.
- Worked on HubSpot CRM integrations, including API connections, workflow automation, field mapping, and admin configuration to support business processes.
- Built and maintained data pipelines for an enterprise client to sync SQL and HubSpot using n8n and AWS Lambda, later extending them with Power Automate and Python to automate insurance tracking and Samsara data, significantly reducing manual processing time.

Junior Software Developer

Feb 2023 – Nov 2023

Learners.ai | Ontario, Canada – Remote

- Developed Python automation scripts and backend tools to reduce repetitive manual work for internal teams.
- Built API integrations between third-party systems with focus on authentication, data consistency, and error handling.
- Supported AWS-based automation tasks, deployment checks, debugging, and maintenance of internal workflows.
- Worked with product and operations teams to clarify requirements, deliver fixes, and improve existing automation processes.

Python Intern

Jun 2019 – Sep 2019

PNY Trainings | Lahore, Pakistan

- Developed and debugged Python web applications using Django and Flask.
- Built REST API endpoints and worked on database models, relationships, and application data flow.
- Collaborated with a development team on backend logic, bug fixes, and application stability improvements.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Flask, SQL, REST APIs

Databases: PostgreSQL, MySQL, data validation, data transformation, reporting queries

Automation & CRM: HubSpot CRM API, HubSpot Workflows, HubSpot Admin, n8n, Power Automate, Zapier, Hightouch

Cloud & Tools: AWS Lambda, AWS, Git, Linux, debugging, deployment support

Languages: English – Professional Working Proficiency, Urdu – Native, French – Beginner

CERTIFICATIONS & PROJECTS

AWS Certified Cloud Practitioner

2024

HubSpot Certifications: Architecture I: Data Models and APIs; Integration with HubSpot I: Foundations; Data Integration Certification 2024

Final Year Project: Student Attendance System using face recognition: Built a face recognition web application using Python, OpenCV, and Flask to automate student attendance tracking.

EDUCATION

Superior University, Lahore

Graduated Nov 2022

Bachelor of Software Engineering

- **Final Year Project:** Student Attendance System using face recognition.
- **Relevant Coursework:** Object-Oriented Programming, Database Systems, Cloud Computing.
